

Aman Singh Chandel

Vice President, Technology - Cloudastra

☎ 7905400369 | ✉ amanchandel4@gmail.com | 📍 Delhi

About Me

11+ years of experience as a software developer and technology leader, with a strong track record of building and scaling commercially successful products from the ground up. Expert in full-stack development, backend systems, and API integrations, with deep experience in driving development lifecycles. Committed to strategic leadership, mentoring teams, and fostering high-performance environments to deliver impactful, scalable software solutions.

Professional Experience

Senior Full Stack Engineer - Cloudastra

Nov '23 - Present | Noida, UP

Client Projects:

Key Ward - AI-Ready Engineering Data Platform

Engineered a robust, end-to-end data platform to serve enterprise clients in the automotive and aerospace sectors, facilitating AI-ready data workflows and scalable engineering solutions.

Core Contributions:

- Architected a multi-tenant data platform utilizing DLT pipelines with custom transformers and multi-source connectors for SQL, REST APIs, and Python.
- Implemented data versioning and lineage tracking using LakeFS to ensure reliable pipeline rollbacks and data integrity.
- Integrated MLflow for automated experiment tracking and model registration, streamlining the transition from research to production.
- Enhanced Apache Superset with custom React/TypeScript plugins to provide advanced filtering and real-time visualization via ECharts and D3.
- Automated performance monitoring by centralizing data from GitHub, Jira, and SonarQube via Airbyte and integrating it into unified dashboards.
- Secured multi-tenant environments by implementing a BFF (Backend-for-Frontend) proxy pattern for credential management.

Tech Stack:

React, TypeScript, Python/Flask, Apache Spark, PostgreSQL, GKE, Docker, MLflow, LakeFS, Airbyte, Apache Superset

Additional Client Projects:

- **Taffi (Fashion Discovery App):** Led planning and development of backend/frontend features for a fashion discovery and stylist-matching application, coordinating team delivery.
- **Volo Health Insurance TPA:** Built backend/frontend for an IRDA-licensed TPA's health insurance claims platform, handling claim status, registration, and grievance workflows.
- **Saarathi Finance:** Delivered backend/frontend components for an NBFC's digital lending platform serving MSMEs, including credit bureau integrations (CIBIL, Experian, CRIF). Tech Stack: Django, PostgreSQL, Temporal.io, Keycloak.
- **WiseYatra (Travel Platform):** Built frontend for a travel booking platform covering flights, hotels, transfers, and activities. Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Zustand, Google Maps API.

Vice President Technology - Siloho

Sep '21 - Oct '23 | Panjim, GOA

Siloho is making designer homes accessible with AI-based technology. A tech-based interior design solution that helps users design and customise their house with different furniture & fittings and colours

- Defined the strategic roadmap and technical vision for the AI-powered interior design platform and internal toolsets.
- Established a 12+ member engineering team, overseeing hiring, professional mentoring, and performance management.
- Led business analysis and requirement design, translating client needs into high-impact technical specifications.
- Optimized development cycles by providing accurate technical estimates and managing cross-functional project priorities.
- Integrated Blender and Unity servers to deliver real-time, high-quality 3D renders based on user-defined parameters.
- Developed a scalable system architecture for both customer-facing and internal web applications using Vue.js and Django.

Product: An online interior Design solution for customer to design their interior house and get high-quality 3D render output within seconds.

Backend: Python - Django

Database: PostgreSQL/Elastic Search/Redis/Realityserver/Blender

Vice President Technology - ftcash (Nomisma Mobile Solutions)

Oct '19 - Sep '21 | Powai, Mumbai

ftcash is a financial services company. ftcash envisions empowering micro-merchants and SMEs through financial inclusion using digital payments and loans.

- Directed the full product development lifecycle for digital payment and lending solutions targeting micro-merchants and SMEs.
- Collaborated with stakeholders to align technology roadmaps with business objectives, delivering 20+ features on schedule.
- Scaled the engineering organization by hiring and training a 40+ member cross-functional development team.
- Modernized project management and code quality standards using Jira, Redmine, and Git-based version control.
- Developed a RESTful billing engine enabling mobile-based merchant invoicing and integrated multiple payment gateways (Razorpay, ICICI).
- Built a complex daily-DPD-based loan management system and automated credit assessment workflows with lender integrations.

Product: An online payment solution for merchants to integrate hassle-free payment solutions on their websites and unsecured business Loan/Secured business loans.

Senior Software Developer - Eros Now

Nov '18 - Oct '19 | Andheri, Mumbai

Eros Now is an Indian subscription-based over-the-top, video-on-demand entertainment and media platform.

Product: On-demand video streaming platform.

Backend: Core-PHP/ Java

Frontend: VueJs

- Drove the system architecture redesign and migration of core APIs from PHP to a high-performance Python-based backend.
 - Provided strategic technical advisory, aligning the technology roadmap with the platform's scaling and content delivery goals.
 - Utilized RabbitMQ and MongoDB to efficiently process and store bulk transaction data during intermittent connectivity scenarios.
-

Senior Software Engineer - Mswipe Technologies

Jan '16 - Oct '18 | Andheri, Mumbai

POS solutions for all types of payment acceptance - cards, wallets, mobile payment apps and bank apps, contactless, and QR payments.

Product: Mventry/Mventry Offline

- Enhanced the Mventry platform to support offline stock management and high-volume POS transaction processing.
 - Successfully onboarded enterprise airline clients (CCD, Vistara, Jet Airways) for in-flight inventory and payment management.
 - Implemented a specialized queue system to handle and sync offline flight transactions reliably once connectivity is restored
-

Software Engineer - Qtriangle Infotech Pvt Ltd

Jan '14 - Jan'16 | Noida

Qtriangle Infotech is an e-commerce development company that provides its users with e-commerce-related information technology.

- Developed e-commerce platforms and technical solutions for clients including Common Floor, Naaptol, and Supporthjelpen.

Technical Skills

- Programming Languages: Python, PHP, TypeScript, JavaScript, SQL
- Frontend: React, Next.js, HTML5, CSS, ECharts, D3, Babylonjs
- Backend: Django, Flask, PHP, Node.js
- Database & Data: PostgreSQL, MySQL, MongoDB, Airbyte, LakeFS
- Data & ML: Apache Superset, MLflow, DLT, Temporal.io, Celery
- Cloud & DevOps: GKE, Docker, Kubernetes, ArgoCD, Cloud Run, AWS services, Helm
- Tools & Platforms: Git, Jira, GitHub, SonarQube, Keycloak, Google Maps API

Education

Bachelor of Engineering – Information Technology

May, 2013 | Kanpur Institute of Technology, Kanpur, Uttar Pradesh
